The World Trade Centre Montréal and the Alzheimer Society of Montreal present the Follow My Heart exhibition

This very special collection of approximately 20 works of art was created during a series of art therapy workshops. Most of the artists are people living with Alzheimer's disease and other dementias.

The exhibition is presented in the lobby of 393, Saint-Jacques Street, from February 24 to March 13, 2014.

Art therapy is a humanistic approach centred on the whole person. It stimulates neurological, cognitive, emotional, perceptual and relational skills and focuses on the individual strengths and aptitudes of each

participant. It represents a unique means of intervention with people with limited verbal skills.

The benefits are manifold: improved well-being and mood, decreased anxiety, the opportunity for positive emotions and social recognition.

A very special exhibition!

Mists of Recollection

From March 12th to April 25th 2014

By artist: AmanPreet Badhwar

The exhibition vernissage will be held Wednesday March 12 th from 4 to 7 PM

The exhibit Mists of Recollection by artist and neuroscientist AmanPreet Badhwar, takes you on a journey through the mind's eye, exploring our perception of past experiences through misty layers of colour, texture and movement.

Using a process that echoes the layering of memory, Aman uses varied media applied in many layers on paper. The effect is to evoke shifting moods and impressions of people and places, rather than precise, static depictions.

She came to Montreal to study Biology at McGill University. She went on to obtain a Master's degree in Human Genetics and a Doctorate in Neurosciences at McGill, studying Alzheimer's dementia and the effect of therapeutics on memory, brain structure and cerebral blood flow at the Montreal Neurological Institute.

She continues to work on Alzheimer's Disease as a postdoctoral fellow here at the IUGM under the supervision of Professor Rick Hoge.
